Who to approach

Automotive suppliers usually enter defence as subcontractors: they sell to the prime contractors and their large suppliers, not to a ministry.

Why this list comes first

In Spain, Indra opened a supplier selection for automotive firms in 2026 for its military vehicle programmes (elDiario.es, 16 June 2026 (https://www.eldiario.es/motor/sector_y_mercado/fabricar-coches-componentes-vehiculos-militares-indra-busca-proveedores-automocion_1_13308288.html)).

Public notices miss most of that work: what a prime buys from its own suppliers is not published. The list below shows who won the published defence-scope contracts under your CPV codes; a company marked as a prime contractor or large defence group is one to offer your work to as a subcontractor; the others supply the buyers directly. A winner whose name says it deals in parts, tyres or hardware is listed apart, as a competitor or distributor rather than a customer.

From 22 Oct 2023 to 22 Oct 2026, in Spain, Germany, France, Poland, Netherlands: 496 companies won defence-scope procurements under your codes. 32 won 3 or more and are named below, most contracts first.

Direct suppliers in Spain

Companies of your country that sell these products to the defence buyers directly: competitors, partners or customers for your parts.

SUMINISTROS MERA SL (Spain)

56 contracts won in Spain; latest notice published 21 Oct 2026.

Wins most from: Jefatura de Asuntos Económicos del Mando de Apoyo Logístico (7); Sección de Asuntos Económicos del Parque y Centro de Mantenimiento de Vehículos Ruedas Nº 1 (2)

Contract values: no stated value

372 other winners with fewer than 3 awards each (448 awards together) are counted, not named. 92 more winners with 3 or more awards (409 awards) are not listed: the list stops at 30, and every prime contractor or large defence group is on it.

All 496 winners for these codes

How we count

A contract here is a procurement with a published winner, counted once however many notices publish it. Under each company, Contract values sums the values of its contracts per currency. The latest notice is the newest publication among them: for Spain's national portal (PLACSP) the date the procurement was published, since its award date is not stored. Marked by name: a group member that carries the group's name; a subsidiary under another name is not marked.

Contract values: The contracts of this list: 22 Oct 2023 to 22 Oct 2026, in Spain, Germany, France, Poland, Netherlands, from TED and PLACSP. Summed per currency, never converted; amounts without VAT where the source states both. A value counts only where a notice (in Spain's national portal, PLACSP, a lot) names this one winner: a value shared by several winners is given to none of them. Only contract values are summed: the ceiling of a framework agreement or dynamic purchasing system, and an estimate where the award states no value, are listed apart and never added, so a framework is never counted with its call-offs. PLACSP values are the awarded amounts; TED values are what the award notice states. Each contract is counted once, however many notices publish it: where TED and PLACSP both do, a contract value before a ceiling, PLACSP's awarded amount before TED's.

Winners are those named in TED result notices and in PLACSP's award results (Spain); a winner published in both is counted once. Natural persons are never counted or named. Direct buying by defence bodies, as published on TED and the national portals we read; not the sub-tier needs of prime contractors, which are not published. TED covers about a tenth of EU defence spending (a 2025 ECIPE policy brief; we have not re-checked that figure). National coverage differs: Spain (PLACSP) and Poland (e-Zamówienia) in full, Germany (the federal procurement office's portal) since 2025, France (BOAMP) since late 2023, the Netherlands (TenderNed) with one defence buyer.

Who buys what you make

Defence-scope notices from 22 Oct 2023 to 22 Oct 2026 with a code under one of your CPV codes, in Spain, Germany, France, Poland, Netherlands: 4311 procurements by 160 core defence buyers and 183 other defence-scope buyers; under Directive 2009/81/EC: 178 of 4311 (4 %).

How we count

Direct buying by defence bodies, as published on TED and the national portals we read; not the sub-tier needs of prime contractors, which are not published. TED covers about a tenth of EU defence spending (a 2025 ECIPE policy brief; we have not re-checked that figure). National coverage differs: Spain (PLACSP) and Poland (e-Zamówienia) in full, Germany (the federal procurement office's portal) since 2025, France (BOAMP) since late 2023, the Netherlands (TenderNed) with one defence buyer.

On paper, each winner below is shown with its newest notice and a notice by its number; the report in the browser lists up to three, with the link to each at its source.

Source: TED (Tenders Electronic Daily), © European Union. Origen de los datos: Ministerio de Hacienda (Plataforma de Contratación del Sector Público).

What the counts mean

Winners are those named in TED result notices and in PLACSP's award results (Spain); a winner published in both is counted once. Natural persons are never counted or named. Computed from the CPV codes and countries in the request; nothing was stored or logged. Counts of notices, not of money: the stated values of notices are budgets or framework ceilings as often as contract values.

A buyer's amount is the sum of the contract values of its awarded procurements under your codes, per currency, each contract once, from notices that give the value to one winner; framework ceilings and estimates are never added.

Appendix A: readiness results

The verdict of each programme and route on your answers. Every rule, its reason and its source are on your results page.

Spanish defence supplier (MoD)

Conditional

No rule is plainly broken, but a condition applies or an answer is missing.

To obtain first: Registration in the defence industry register (RID).

5 answers are missing.

3 rules stay open on answers “I am not sure”.

NATO and NSPA supply

Obtain first

Every rule of this route that applies to you is met except a registration you can obtain. Once you hold it, no rule of this route blocks you on the answers given.

To obtain first: NCAGE code.

Appendix B: supplier roadmap, with the free guides and grants

2 items are in place, 2 are needed now on your answers, and 4 depend on a contract, a condition or an answer. 2 items need a specialist. Meeting these requirements does not win a contract: each buyer sets its own conditions in the tender documents.

In place first, then what is needed now, then what depends on a contract, a condition or an answer; a step that must come first is always listed first. Cost and time are in the words of the requirement's source, as on your roadmap page; where no source states one, the line says so.

In Spain these steps are covered by free public material: the guides to the RID and to PECAL/AQAP of Murcia's CAETRA programme, and regional programmes that have paid for the steps themselves (on each step below, with the call or list they come from). A free course:

- Dual Technology & Industry Readiness Programme (https://es.ara.cat/economia/industria/gobierno-impulsa-plan-introducir-400-empresas-sector-defensa_1_5703773.html) (ACCIÓ (Generalitat de Catalunya), announced 10 April 2026): a free 7-hour in-person course for 400 companies (automotive, space, metalworking, machinery) on certifications, homologation and access to state and EU procurement.

1. ISO 9001 quality management certificate

In place

In place: you hold it.

Named by: Spanish defence supplier (MoD).

2. IATF 16949

In place

In place: you hold it. No rule of this check reads it.

3. NCAGE code

Needed now

Missing, and needed for what you said you do.

You need an NCAGE code to supply through NSPA or to have NATO stock numbers assigned. It is free of charge.

Named by: NATO and NSPA supply; Spanish defence supplier (MoD).

Cost	Free of charge (NSPA)
Time	Up to 14 working days on average; routine priority is 10 calendar days, emergency is 3 working days

Issued by: Unidad de Catalogación (SECAT-OC), acting as Oficina Nacional de Catalogación (ONC) for NATO, within SDG INREID, Dirección General de Armamento y Material (DGAM), Ministerio de Defensa.

To answer: Is a product of yours bought by the Ministry of Defence (so that it must be catalogued), or do you need an NCAGE code to register in the US System for Award Management (SAM)?

Source: NSPA NCAGE Code Request Tool · **Open the source** (https://eportal.nspa.nato.int/Codification/CageTool/) · Last reviewed 2026-09-07

> …a five-character entity identifier, required for NSN assignment, for registration in NATO and national supply systems, and for procurement through NSPA.

4. RID registration (Registro de la Industria de Defensa, Spain)

Needed now

Missing, and needed for what you said you do.

You need a current RID certificate to be in the Ministry of Defence's catalogue of actual or potential suppliers, and for PECAL certification and the NATO Declaration of Eligibility. It is requested online from the DIGEID, with the company's electronic certificate.

Named by: Spanish defence supplier (MoD).

Cost Not stated by the source

Time Not stated by the source

Issued by: Dirección General de Estrategia e Innovación de la Industria de Defensa (DIGEID), Ministerio de Defensa.

Source: Ministerio de Defensa, e-office procedure "Registro de la Industria de Defensa - RID" (SIA 993054) · **Open the source** (https://sede.defensa.gob.es/acceda/procedimientos) · Last reviewed 2026-10-20

> [Ministerio de Defensa, e-office procedure list, RID (SIA 993054)] TRAMITACIÓN DEL CERTIFICADO DE INSCRIPCIÓN O RENOVACIÓN DEL CERTIFICADO EN EL REGISTRO DE LA INDUSTRIA DE DEFENSA (RID) DE LA DIRECCIÓN GENERAL DE ESTRATEGIA E INNOVACIÓN DE LA INDUSTRIA DE DEFENSA (DIGEID), REQUISITO NECESARIO PARA FORMAR PARTE DEL CATÁLOGO DE PROVEEDORES REALES O POTENCIALES DEL MINISTERIO DE DEFENSA, ASÍ COMO OTROS PROCEDIMIENTOS DEL MINISTERIO DE DEFENSA.

Free guide: Guide to registration in the RID (Registro de Empresas DGAM) (https://caetraprogramme.institutofomentomurcia.es/wp-content/uploads/2024/11/1_Guia_CAETRA_RegistroDGAM.pdf) (CAETRA programme, Instituto de Fomento de la Región de Murcia, November 2024).

Regional grants that have paid for this step:

- **Closed** Aragón (your region): IAF, Orden ECE/1276/2026 (BOA 4 September 2026) (https://www.iustel.com/diario_del_derecho/noticia.asp?ref_iustel=1269075), for PECAL/AQAP, ISO 9001 and EN 9100; RID registration; HSEM/HSES paperwork; homologation; tender and proposal consultancy; EUR 5,000 to 30,000 per company; 70 % for micro-companies and start-ups, 50 % for SMEs (call open 7 to 25 September 2026 (closed)).

Check the current call before you count on it: windows, amounts and conditions change from one call to the next, and the figures are those of the call or list named.

5. AQAP 2110 quality assurance certification

Depends

Only when a contract names it.

AQAP 2110 (or 2310 for aviation and space) is required where a NATO or national contract names it. This service cannot know which of your target contracts do.

Comes after: ISO 9001 quality management certificate.

Cost Not stated by the source

Time Not stated by the source

Issued by: Spanish state route: PECAL, audited through DGAM structures.

Source: NATO Standardization Office · **Open the source** (https://nso.nato.int/) · Last reviewed 2026-09-07

> AQAP enters through individual contracts: when a prime or a national buyer names it, and it then cascades down the supply chain to subcontractors.

Free guide: Guide to PECAL/AQAP certification (https://caetraprogramme.institutofomentomurcia.es/wp-content/uploads/2026/06/3_Guia_CAETRA_PECAL_AQAP.pdf) (CAETRA programme, Instituto de Fomento de la Región de Murcia, June 2026).

Regional grants that have paid for this step:

- **Closed** Aragón: IAF, Orden ECE/1276/2026 (BOA 4 September 2026) (described under "RID registration (Registro de la Industria de Defensa, Spain)" above).

6. PECAL certification (Spain, DGAM)

Depends

Only when a contract names it.

The PECAL (Spanish quality publications based on NATO's AQAP) are requirements only of the defence contracts that include them. When a contract names one, you must meet it under the oversight of a DGAM quality representative (RAC). Read the technical (PPT) and administrative (PCAP) specifications of the contracts you target.

Comes after: ISO 9001 quality management certificate; RID registration (Registro de la Industria de Defensa, Spain).

Named by: Spanish defence supplier (MoD).

Cost Not stated by the source

Time Not stated by the source

Issued by: Dirección General de Armamento y Material (DGAM), Ministerio de Defensa.

The chicken-and-egg of PECAL: the DGAM's initial audit expects a PECAL system audited by your management for at least nine months and at least one Ministry of Defence contract with PECAL requirements in the last two years (or a certificate of conformity signed by a DGAM quality representative). A newcomer therefore usually meets PECAL inside a first contract, under the quality representative's oversight, and applies for the certificate afterwards. It is not a block before a first contract: get the RID and ISO 9001 (or EN 9100) first.

Consultant needed. Prime qualification: if you supply through a prime contractor and not the Ministry directly, the prime qualifies its suppliers by its own procedure, which none of the sources read here publishes. Ask the prime, or a consultant, what it requires.

To answer: Do you want the PECAL certificate of your quality management system itself, and not only to meet PECAL requirements inside a contract?

To answer: Has your PECAL quality system been in place, and audited by your management, for at least nine months?

To answer: In the last two years, have you had at least one Ministry of Defence contract with PECAL requirements, or a certificate of conformity signed by a DGAM quality representative (RAC)?

Source: Ministerio de Defensa, Aseguramiento de la calidad (PECAL) · **Open the source** (https://www.defensa.gob.es/portalservicios/servicios/industriadefensa/aseguramientocalidad/index.html) · Last reviewed 2026-10-20

> [Ministerio de Defensa, Aseguramiento de la calidad] Las publicaciones españolas de calidad (PECAL), que están basadas en las correspondientes publicaciones AQAP de la OTAN, especifican los requisitos de la OTAN y del Ministerio de Defensa de España para la gestión de la calidad que deben cumplir los suministradores en los contratos de Defensa en los que se las incluye

Free guide: Guide to PECAL/AQAP certification (https://caetraprogramme.institutofomentomurcia.es/wp-content/uploads/2026/06/3_Guia_CAETRA_PECAL_AQAP.pdf) (CAETRA programme, Instituto de Fomento de la Región de Murcia, June 2026).

Regional grants that have paid for this step:

- **Closed** Aragón: IAF, Orden ECE/1276/2026 (BOA 4 September 2026) (described under "RID registration (Registro de la Industria de Defensa, Spain)" above).

7. HSEM facility security clearance (Spain)

Depends

Needs an answer.

Answer the questions that are missing to see whether this applies to you.

Named by: Spanish defence supplier (MoD); the general requirements.

Cost Not stated by the source

Time Not stated by the source

To answer: Will you handle classified information?

To answer: Do you hold: HSEM facility security clearance (Spain)?

Source: Ley 24/2011, art. 21.2 (consolidated text, BOE) · Open the source (https://www.boe.es/eli/es/l/2011/08/01/24/con) · Last reviewed 2026-10-20

> [Ley 24/2011, art. 21.2] Asimismo, el órgano de contratación deberá incluir la exigencia a los candidatos o licitadores de estar en posesión de las correspondientes habilitaciones en materia de seguridad de empresa y, en su caso, de establecimiento, de conformidad en todo caso con el grado de clasificación de la información. Los requisitos a que se refiere el párrafo anterior serán aplicables a todos los subcontratistas, en cualquier nivel de la cadena de subcontratación, que vayan a tener acceso a información clasificada [...]

Regional grants that have paid for this step:

- **Closed** Aragón: IAF, Orden ECE/1276/2026 (BOA 4 September 2026) (described under "RID registration (Registro de la Industria de Defensa, Spain)" above).

8. HSES establishment security clearance (Spain)

Depends

Needs an answer.

Say whether classified information will be stored at your site, and whether you hold the HSES.

Named by: Spanish defence supplier (MoD).

Cost Not stated by the source

Time Not stated by the source

Consultant needed. HSES path: what your site needs (secure storage, the company's control body, personnel clearances) is set case by case with the DGAM, or with the ONS for NATO, EU and ESA information, and the sources read here publish no cost or duration. A security consultant can tell you what it takes for your site.

To answer: Will you handle classified information?

To answer: Will classified information be stored on your own premises?

To answer: Does the company hold an HSES (establishment security clearance)?

Source: Ministerio de Defensa, Seguridad de la información en las empresas (SEGINFOEMP) · Open the source (https://www.defensa.gob.es/portalservicios/servicios/industriadefensa/seginfoemp/index.html) · Last reviewed 2026-10-20

> [Ministerio de Defensa, SEGINFOEMP page] Estas habilitaciones son la Habilitación de Seguridad de Empresa (HSEM) y, si además han de almacenar información clasificada en sus instalaciones, la Habilitación de Seguridad de establecimiento (HSES).

Regional grants that have paid for this step:

- **Closed** Aragón: IAF, Orden ECE/1276/2026 (BOA 4 September 2026) (described under "RID registration (Registro de la Industria de Defensa, Spain)" above).

Appendix C: company profile

As entered in this browser. Nothing is added or inferred.

Established in	Spain, Aragón
Size	50 to 249 staff
NACE code	24.51
Foreign investor owns or controls part	No
What you make (CPV)	34300000 Parts and accessories for vehicles and their engines 34320000 Mechanical spare parts except engines and engine parts 34330000 Spare parts for goods vehicles, vans and cars 35420000 Parts of military vehicles 35421000 Mechanical spare parts for military vehicles 34322000 Brakes and brake parts 34312000 Engine parts 44470000 Cast-iron products 44530000 Fasteners 31611000 Wiring sets
Processes	Casting, Machining
Certificates and registrations held	ISO 9001; IATF 16949
US-origin components	No
Access to classified information	Not sure
Exports	Yes, to other EU countries

Do you want the PECAL certificate of your quality management system itself, and not only to meet PECAL requirements inside a contract?	Not sure
Do you target PECAL 2310 (aviation, space and defence)?	No
Is a product of yours bought by the Ministry of Defence (so that it must be catalogued), or do you need an NCAGE code to register in the US System for Award Management (SAM)?	Not sure
Is your product for specific defence use (Article 346 of the Treaty on the Functioning of the EU), rather than a civilian product?	No
Does a NATO contract you target involve information classified NATO CONFIDENTIAL or higher?	No
Do you want to bid in a NATO international competitive bidding tender (NATO Security Investment Programme)?	No
Do you receive defence-related products from other EEA states?	No

About this report

Indicative, sources linked, not legal advice.

It applies the rules of the sources linked above to the answers given in this browser. It is not legal advice, and it does not say that you will be awarded a contract. Where it says a specialist is needed, it gives no answer of its own.

This is a structured reading of the rules of each programme, with the text of the regulation beside every line. It is not legal advice and it does not replace the call text or the contracting authority. It does not cover the exclusion criteria and the financial and operational capacity checks of the Financial Regulation, or the conditions each call sets. The answers were not stored. Rules last reviewed on 2026-10-20. Generated on 12 Oct 2026, 08:00 UTC.Two requests left this browser to make it: the one that computes the verdict, with the answers the rules read, and the one for the demand map, with your CPV codes and nothing else; the server does not store or log either.
