Elsewhere: Spain (12); Germany (4); Poland (7).

Who to approach

Services such as transport, fuel, facilities, catering, repair and training are bought by the defence bodies directly; below are the companies that won those contracts under your codes.

From 22 Oct 2023 to 22 Oct 2026, in Spain, Germany, France, Poland, Netherlands: 496 companies won defence-scope procurements under your codes. 32 won 3 or more and are named below, most contracts first.

Prime contractors and large defence groups among them

SAAB AB (Sweden) **Prime or large defence group: Saab** **EDF projects: 3**

4 contracts won in Spain; latest notice published 11 Aug 2026.

Contract values: EUR 29,346,227 over 1 contract; 3 of 4 contracts state none

---

Indra Sistemas, S.A. (Spain) **Prime or large defence group: Indra** **EDF projects: 64**

3 contracts won in Spain; latest notice published 27 Feb 2026.

Contract values: EUR 476,301 over 1 contract; 2 of 3 contracts state none

372 other winners with fewer than 3 awards each (448 awards together) are counted, not named. 92 more winners with 3 or more awards (409 awards) are not listed: the list stops at 30, and every prime contractor or large defence group is on it.

All 496 winners for these codes

Who buys what you provide

Defence-scope notices from 22 Oct 2023 to 22 Oct 2026 with a code under one of your CPV codes, in Spain, Germany, France, Poland, Netherlands: 4311 procurements by 160 core defence buyers and 183 other defence-scope buyers; under Directive 2009/81/EC: 178 of 4311 (4 %).

On paper, each winner below is shown with its newest notice and a notice by its number; the report in the browser lists up to three, with the link to each at its source.

Netherlands (your country)

90 procurements by 3 core defence buyers and 3 other defence-scope buyers; under Directive 2009/81/EC: 19 of 90 (21 %); with a published winner: 15.

Appendix B: supplier roadmap, with the free guides and grants

4 items are in place, 0 are needed now on your answers, and 2 depend on a contract, a condition or an answer. Meeting these requirements does not win a contract: each buyer sets its own conditions in the tender documents.

In place first, then what is needed now, then what depends on a contract, a condition or an answer; a step that must come first is always listed first. Cost and time are in the words of the requirement's source, as on your roadmap page; where no source states one, the line says so.

Your national route: Netherlands

Supplying the armed forces of the Netherlands

Not covered yet for the Netherlands: a national supplier route (registrations, licences and security clearances of your country). Check with the buyer named in each tender, whose documents state what a bidder must hold; the NATO and EU steps of your roadmap apply as they are.

NCAGE code

Not covered yet for the Netherlands: which office issues NCAGE codes (for a NATO member, its national codification bureau). Check with NSPA, whose NCAGE request tool is where a request starts.

NSPA: request an NCAGE code (https://eportal.nspa.nato.int/Codification/CageTool/request-new-cage)

1. ISO 9001 quality management certificate

In place

In place: you hold it.

2. VCA (safety checklist for contractors)

In place

In place: you hold it. No rule of this check reads it.

3. ISO 14001 (environmental management)

In place

In place: you hold it. No rule of this check reads it.

4. ISO 45001 (occupational health and safety)

In place

In place: you hold it. No rule of this check reads it.

5. NCAGE code

Depends

Needs an answer.

Answer the questions that are missing to see whether this applies to you.

Cost	Free of charge (NSPA)
Time	Up to 14 working days on average; routine priority is 10 calendar days, emergency is 3 working days

Issued by: Not covered yet for the Netherlands: which office issues NCAGE codes (for a NATO member, its national codification bureau). Check with NSPA, whose NCAGE request tool is where a request starts..

To answer: Do you hold: NCAGE code?

6. AQAP 2110 quality assurance certification

Depends

Only when a contract names it.

AQAP 2110 (or 2310 for aviation and space) is required where a NATO or national contract names it. This service cannot know which of your target contracts do.

Comes after: ISO 9001 quality management certificate.

Cost USD 17,000 to 25,000 for a small firm that already holds ISO 9001 (vendor quote) (vendor range, not a benchmark)

Time 3-4 months

About this report

Indicative, sources linked, not legal advice.

It applies the rules of the sources linked above to the answers given in this browser. It is not legal advice, and it does not say that you will be awarded a contract. Where it says a specialist is needed, it gives no answer of its own.

This is a structured reading of the rules of each programme, with the text of the regulation beside every line. It is not legal advice and it does not replace the call text or the contracting authority. It does not cover the exclusion criteria and the financial and operational capacity checks of the Financial Regulation, or the conditions each call sets. The answers were not stored. Rules last reviewed on 2026-10-20. Generated on 12 Oct 2026, 08:00 UTC.Two requests left this browser to make it: the one that computes the verdict, with the answers the rules read, and the one for the demand map, with your CPV codes and nothing else; the server does not store or log either.
